

US005970164A

United States Patent [19]
Bamberger et al.

[11] **Patent Number:** **5,970,164**
[45] **Date of Patent:** **Oct. 19, 1999**

- [54] **SYSTEM AND METHOD FOR DIAGNOSIS OF LIVING TISSUE DISEASES**
- [75] Inventors: **Philippe Bamberger; Isaac Leichter; Scott Fields; Yuriy Alexandrov**, all of Jerusalem; **Vlad Mendelevich**, Herzlia, all of Israel
- [73] Assignee: **SophisView Technologies, Ltd.**, Jerusalem, Israel
- [21] Appl. No.: **08/803,328**
- [22] Filed: **Feb. 21, 1997**

Related U.S. Application Data

- [63] Continuation of application No. 08/345,052, Nov. 25, 1994, abandoned, which is a continuation-in-part of application No. 08/289,381, Aug. 11, 1994.

[57] **ABSTRACT**

A system and method for diagnosis of living tissue diseases is described. The system includes a computer device for controlling its operation. An operator control device is coupled to the computer device. A viewing screen is coupled to the computer device for displaying digitized images of the living tissue. The operator, using the control device, selects desired portions of the digitized image for further image enhancement according to a desired image enhancement feature selectable from a plurality of image enhancement features. The image enhancement features include any combination of grey scale stretching, contrast enhancement based on logarithmic histogram equalization, spot enhancement and magnification. The system further includes means for visualization and quantification of micro-calcifications, and means for visualization and quantification of mass spiculations.
